Centerlock Rotor Adaptor™

The Problem Solvers Centerlock Rotor Adaptor converts Shimano Center-Lock hubs to work with any standard 6-bolt rotor and brake combination.

Product uses:

The Centerlock Rotor Adaptor was specifically designed to convert Center-Lock splined disc brake hubs for use with 165mm diameter standard 6-bolt rotors and disc brake. This adapter converts Shimano XTR, XT, LX, Deore and DT Center-Lock hubs to standard 6-bolt ISO rotor mount to allow use of any 6-bolt rotor/brake combination. Problem Solvers gives you more possibilities for setting up your bike the way you want it.

Technical details:

- Made of 6061-T6 anodized aluminum
- Extruded, machined and broached
- 4mm mounting bolt and required installation with torque wrench
- Fits XTR, XT, LX, Deore and all Shimano aftermarket Center-Lock hubs
- Does not fit Saint hubs or XTR and XT Shimano wheelsets because of the different spline pattern and clearance issues with the hub flange

Product number:

BR0380 PS Centerlock Rotor Adaptor
